

Design Chain Associates, LLC offers a complete suite of business and technical services to clients that need to understand and comply with substance, energy efficiency, recycling and social responsibility-related product health/environmental regulations and customer or market requirements. We focus on RoHS, WEEE, Eco-Design, REACH, Batteries, Packaging, Prop 65, Conflict Minerals, Circular Economy, Low-Halogen and similar regulations and requirements around the world.

Product Assessment We provide answers to these questions: Are our products within the scope of the regulation? Are there exemptions or exclusions we can take advantage of? What should we be doing now to comply, and in the future to maximize efficiency while ensuring compliance?

Gap Assessment What are you doing today to comply? Whether the answer is "nothing yet", "we're well on our way", or "we've done it", DCA evaluates your current state and makes recommendations ranging from "check-the-box" to a complete, step-by-step plan to achieve compliance while improving efficiency and profitability.

Product Compliance Services We offer a variety of levels of service that can include

- ❖ **Risk Assessment and Mitigation** We can review your BOMs for supply chain, environmental compliance and lifecycle risks and work closely with your design, procurement, and manufacturing organizations to produce mitigation plans for high risk suppliers, technologies, and components.
- ❖ **Material Data Collection and Aggregation** Component-level compliance is assessed; compliant alternatives identified, and substance disclosures collected, enabling you to validate compliance for your products.

Business Assessment & Recommendation Service Organizational structures, software and operating procedures must be reviewed and updated to ensure continued product We can help you review your organization, processes and tools against what will be required, then develop and support your implementation of an action plan.

- ❖ **Business Processes** DCA can help ensure that you have efficient and effective business processes to develop a Design for Environment process, collect the right data in your New Part Request process, implement "Green" BOM Reviews, clarify your spares management process, etc.
- ❖ **System of Record** The capabilities of tools to help you manage compliance are improving. Whether you're satisfied with your PLM/ERP/Compliance, etc. software or not, DCA can help you define your needs and review software capabilities.

Training DCA can provide a private seminar for your company or your suppliers on product-targeted environmental regulations such as China RoHS, US regulations, EU RoHS/WEEE/Eco-Design/REACH, strategic approaches, best-practice business processes and much more.

Legislation/Regulation Monitoring Service Are you aware of all the upcoming requirements around the world that could impact your ability to ship product? Are there regulations that impact your product you don't know about that could suddenly disrupt your revenue stream? DCA provides a worldwide monitoring service that filters and focuses the fire hose of regulatory information down to what will impact your business.

Corporate Policy and Strategy Stop reacting and start planning ahead. We understand where this is all heading and can help you plan ahead, reduce costs, and improve operational efficiency and profitability.

Depend on Design Chain Associates We know suppliers, components, and the product lifecycle, and we know the needs of discrete product manufacturers. We can help you define and/or meet your product environmental performance goals. Make sure you can still ship product worldwide or gain competitive advantage: Talk to DCA.
